PROJECT EXPERIENCE

KALAMAZOO RIVER VALLEY TRAILWAY MASTER PLAN

SOUTHWEST MICHIGAN (COMPLETED)

Terri Musser served as Project Manager for a master plan and an implementation action plan for a 30-mile multi-purpose trailway between Battle Creek and Kalamazoo, Michigan.

Through a unique arrangement, our consultant team was able to build off of existing work of the Kalamazoo River Valley Trailway Partnership -- a volunteer coalition of approximately 300 community residents working to conserve lands, protect water quality, restore habitat, and raise awareness for the trailway concept along the Kalamazoo River.

The consultants worked under the guidance of local Trailway Teams to develop a cohesive master plan using GIS and help the citizen teams handle difficult design and implementation issues.

Client: City of Kalamazoo, Public Services Department
