

CITY OF GUNNISON TRANSPORTATION MASTER PLAN

GUNNISON, COLORADO (COMPLETED)

Charlier Associates, Inc. prepared an update of the Transportation Element to the City of Gunnison Master Plan. The update included a bicycle circulation plan, street extensions plan, streets and alleys capital improvements plan, access management plan, downtown circulation plan, and a transit plan. The multi-modal planning document was fully integrated in to the City Master Plan and set horizon for 5 and 15 year intervals. The recommendations of the report served the basis for capital improvement programming in the City and within the Upper Gunnison River Valley Region.

Key project goals included:

- Improving circulation for all modes of travel
- Incorporate recommendations from the Upper Gunnison Valley Transportation Plan
- Guide growth through the implementation of street extensions, consistent with urban development in the Town's Three Mile Plan
- Implement revised street standards based on a functional classification system
